TOTAL PROTECTION WITH OUR GLASS & FRAME PROTECTION SYSTEM

Internationally certified transparent protection solution designed to withstand explosions, blast pressure, forced entry, and high-level security threats.

LUXURY RESIDENCE
Elegant design with uncompromising safety for high-end living.

GOVERNMENT BUILDING
Protecting critical assets and public infrastructure with reliable perfomance.

POLICE STATION
Enhancing safety and security for law enforcement facilities and personnel.

KEY BENEFITS

Engineered to deliver maximum security without compromising aesthetics and comfort.

FAST INSTALLATION
Modular system designed for quick and efficient installation.

HIGH SECURITY CERTIFIED
Tested and certified by internationally recognized laboratories for blast, ballictic, and intrusion resistance.

LIGHTWEIGHT & SLIM PROFILE
Slim design with optimized structural performance for easier handling and better aesthetics.

TAILORED ENGINEERING
Custom engineering solutions tailored to your architectural design and specific threat requirements.

ANTI-BANDIT GLASS

LEVELS OF PROTECTION

Model	Standar	Classifi-cation	Protection	Area Density	Thickness
Anti Bandit P4A	EN356	P4A	3 Ball Drops	25 kg/m²	10.28 mm
Anti Bandit P5A	EN356	P5A	9 Ball Drops	25 kg/m²	10.77 mm
Anti Bandit P6B	EN356	P6B	30 to 50 hits from an Axe & Hammer	30 kg/m²	14.45 mm
Anti Bandit P7B	EN356	P7B	51 to 70 hits from an Axe & Hammer	45 kg/m²	22 mm
Anti Bandit P8B	EN356	P8B	More than 70 hits from an Axe & Hammer	45 kg/m²	22 mm
Anti Bandit P8B Privacy Smart Glass	EN356	P8B	More than 70 hits from an Axe & Hammer	40 kg/m²	19 mm

CERTIFIED INTERNATIONALLY

- CEN EN 1063
- STANAG 4569 (AEP-55)
- NIJ 0108.01
- UL752

TECHNICAL SPECIFICATIONS

FRAME THICKNESS
Minimum 59 mm
(Alumunium / Steel Reinforced)

GLASS THICKNESS
Starting from 22 mm
(Multi-Layered Laminated Glass)

MAXIMUM SIZE
Width : 1500 mm
Height : 3000 mm

CUSTOMIZATION AVAILABLE
Glass thickness, colors, frame finishes, and dimensions can be customized to meet your project requirements.

PERFORMANCE LEVEL

SMALL FIREARMS RESISTANCE
Glass thickness, colors, frame finishes, and dimensions can be customized to meet your project requirements.

ANTI-INTRUSION
Provides superior resistance against forced entry using heavy tools and manual attacks.

SOUND ACOUSTIC
Reduces external noise transmission for better acoustic comfort and privacy

ENERGY SAVING
Helps reduce heat transfer for improved energy efficiency and indoor comfort.

Suported by : DSG Made in Singapore

VERSATILE APPLICATIONS & ADVANCED PROTECTION

Engineered to provide transparent security solution for residential, commercial, and critical infrastructure application.

APPLICATIONS

FRONT DOOR
Elegant protection for luxury residential entrances.

WINDOW SYSTEM
Transparent security without compromising natural light.

BACK DOOR
Reinforced access points for encanced protection.

FACADE
Secure architectural glazing for modern buildings.

SAFE ROOM & DISPLAY
Dedicated protection for high-value assets and sensitive areas.

SECURITY AGAINST VIOLENT ATTACKS

Riot & Forced Entry Resistance
- Anti-vandalism protection
- Delays forced intrusion attempts
- Designed for public facilities and high-risk environments
- Enhanced occupant safety

FIRE-RATED SOLUTIONS

Additional Fire Protection Capability
- Available with fire-rated configurations
- Helps contain flames and smoke spread
- Suitable for critical infrastructure and emergency exits
- Tested to international standards

CUSTOM PROFILE COLORS

Archictectural Flexibility
Available in various finishes and colors:

BLACK

BRONZE

SILVER

DARK GRAY

WHITE
